AT-B Series

Unmatched Durability and Accuracy

Durable, Dependable, High Value Auto Levels

**Three models –
32x, 28x, and 24x
magnifications**

**Ultra-short 20 cm
focusing**

**All-weather
dependability**

**±5 Degrees
self-leveling range**

**Clampless, endless
fine horizontal
adjustments**

Rapid, stable, durable compensator

The compensator of AT-B Series incorporates four suspension wires made of super-high-tensile metal, which features minimal thermal expansion coefficient – providing unmatched durability and accuracy. The finely tuned magnetic damping system quickly levels and stabilizes the line-of-sight despite the fine vibrations present when working near heavy equipment or busy roadways.

Horizontal circle for measurement

Horizontal angles can be directly read in 1° or 1 gon units. The free rotation feature allows you to read any angle from zero. The circle is covered for protection against dirt and scratches and the readout window is located below the eyepiece for quick reference.

20 cm - Short minimum focus

The AT-B Series can focus on objects 20 cm in front of the telescope. This feature dramatically facilitates working in confined spaces.

All-weather dependability

With the IPX6 rating, the instrument is protected against powerful water jets from all directions, meaning the AT-B Series withstands a sudden shower or torrential rainfall. The advanced protection design also deters clouding or condensation inside the telescope.

Key Components

- AT-B level
- Hex wrench
- Adjusting pins (AT-B2 only)
- Vinyl cover
- Cleaning cloth
- User manual
- Hard case
