TAP FEED Lite

EZ Indicators

Easy cloud-based Feed Management solution

Go Paperless

TAP FEED Lite an EZ Digital Feed Management Tool

Move into digital feed management at your own pace. Topcon's feed management solution provides two effective tools to simply replace your paper feed sheets and manage loading your rations and ingredients precisely.

Use Topcon's Bluetooth® indicators along with the TAP FEED App to ensure accurate feed ration delivery. Make daily adjustments to pen call weights and head counts through the simple interface. The TAP FEED App will provide users with the required ingredient and delivery weights for precise feeding accuracy.

For users looking for a more complete management solution, the TAP FEED Lite software is cloud-based and starts with a free 3-month subscription. Compatible with all current and legacy Topcon feed management indicators, TAP FEED Lite provides the tools needed to successfully monitor the daily feeding process.
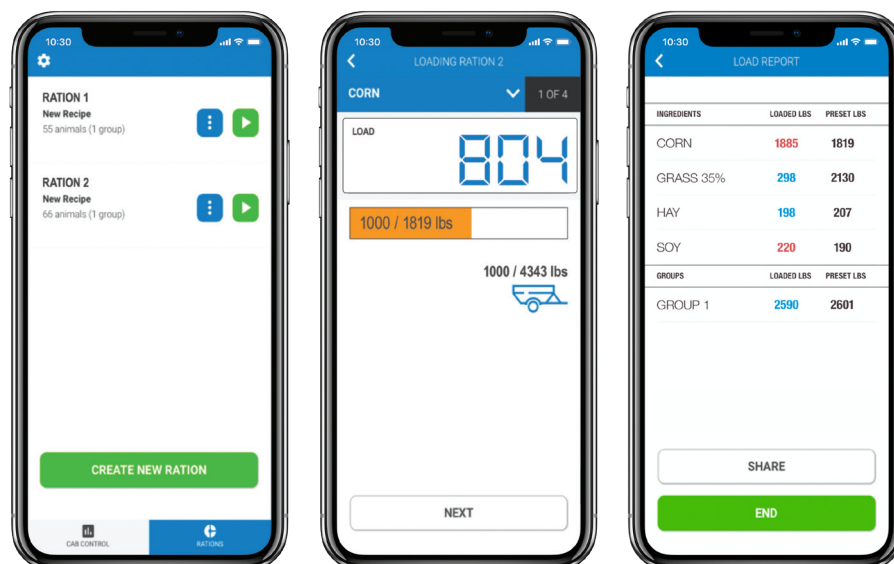

Track daily intakes, operator accuracy, ingredient usage and commodity dry matters for consistent ration design. Use the Sharing feature with your nutritionist and you both can have access to make changes to pen counts and rations quickly and electronically.

Optimize ration inputs through precision loading, improving profitability

Free mobile app (FEED) for in-cab control and monitoring improving efficiency and eliminating manual feed sheets

Remote support capability for reduced downtime

Field-proven components for dependability

Solution Overview

①

②

FEED App
In-cab app for increased control

TAP FEED Lite
Online access for true feeding management

Key Solution Features

- Free mobile device application, FEED (available on Android and iOS)
- Integrated Bluetooth® on EZ 2805/2810 and EZ 3405/3410 indicators for remote connectivity
- Indicators offer 1.7" (43 mm) sunlight-readable display
- Preset weight function
- Internal alarms
- Mixing timer
- Rotation counter / machine hour meter (rotation counter cable kit required)

Feed Management

Bluetooth Displays

Standard Indicator Features

Digi-Star 2805
- Bluetooth integration for use with FEED App and Tap Feed subscription
- Uses the EZ2500 menu system
- Direct Access Number (D.A.N.) are not available
- Provides Serial Port and Scoreboard Port (J904)

Digi-Star 2810
- Bluetooth integration for use with FEED App and Tap Feed subscription
- Uses 10 Series menu system
- 4-digit Direct Access Number (D.A.N.) access via numeric keypad
- Provides Dual Serial Port (J905)

Digi-Star 3405
- Bluetooth integration for use with FEED App and Tap Feed subscription
- Uses the EZ2500 menu system
- Internal Batching program with memory for up to 99 ingredients
- Provides Serial Port and Scoreboard Port (J904)

Digi-Star 3410
- Bluetooth integration for use with FEED App and Tap Feed subscription
- Uses 10 Series menu system
- Internal Batching program with memory for up to 200 ingredient
- Provides Dual Serial Port (J905)
