For demanding work on the move

Get precise centimeter-level accuracy effortlessly with this compact powerhouse, ideal for various survey and construction tasks. The HiPer CR eXclusive Topcon Receiver Service (XTRS) is an ultra-lightweight and compact network solution that minimizes pole weight, ensuring easy mobility and field usability. Despite its small size, the HiPer CR XTRS integrated helical antenna excels in challenging canopy and jobsite environments, delivering exceptional performance.

Ready, set, go network receiver

Designed to only work with the Topnet Live GNSS network, this out of the box solution utilizes one of the one of the fastest growing network correction services in the world. Get the job completed faster with simplified workflows and less equipment.

Have it your way

Choose between either MAGNET Field engineering software or Pocket 3D construction and grade checking software. Flexible solutions for the way you work.

Anywhere, anytime

Topnet Live offers worldwide 24 hour coverage. When you need to get the job done, Topnet Live is there when you need it.

- » RTK high-performance positioning
- » Up to 10-hour battery life
- » Bluetooth Low Energy (BLE)
