

Reduce costs. Fine-tune performance.

Cloud based feed management software
(TAP FEED Feedlot)

Feed Your Way

TAP FEED Feedlot

Valuable for any feedlot operation who needs to track feed or other costs by Lot or by Owner. Easily manages ingredients, recipes, animal pen movements, bunk scores and operators. Efficiently create and export comprehensive reports that include operator accuracy, commodity usage and lot closeout summaries.

TAP FEED App

Easy to use with relevant features for feed management, the App is free with the latest lineup of Bluetooth® Topcon/Digi-Star displays and weigh convertors – enabling an organic transition into feed management software.

Feed Mixer Weighing

After determining the feed plan or TMR, loading is the next step in managing inputs, improving efficiency, optimization, and enabling performance tracking. Topcon feed mixer weighing, comprising Digi-Star product line indicators, convertors and load cells, ensures accurate execution and logging. Our solutions also offer a mobile app as an additional display (CabControl or TAP FEED) and a connection point to feed management software (TAP FEED).

Managing feed can be challenging. From loading and tracking to logging and optimization, dairy and beef farmers need a streamlined approach. TAP FEED Feedlot fuses management software with load mixer integration. It's designed in collaboration with industry partners to provide easy-to-use features to improve efficiency, reduce waste and improve production.

TAP FEED App

- Any livestock operation
- Workflow integrated into feed mixer
(Requires Topcon display or convertor. Compatible with legacy Digi-Star hardware)
- Connected to TAP FEED Feedlot
- Basic load report
- Loads and recipes
- Feeding groups

TAP FEED Feedlot

- Any feedlot operation
- Workflow integrated into feed mixer
(Requires Topcon display or convertor. Compatible with legacy Digi-Star hardware)
- Connected to any Digi-Star feeding hardware and feed app
- Core feedlot management capability
- Lot closeout report

Advanced Inventory Manager

Tools to manage and track feed inventory, including input ordering features, ingredient and inventory management, re-ordering system, weighbridge (third party connection), inventory alerts, and inventory reports.
