

Auto Section Control (ASC)

Horizon Software Feature

Automatically Switch Sections

Related Features

Variable Rate Control

Automatic variable rate control for compatible application controllers.

Horizon XTEND

Access many Horizon OS features on your mobile device.

Compatible Consoles

- XD
- XD+
- X25
- X35

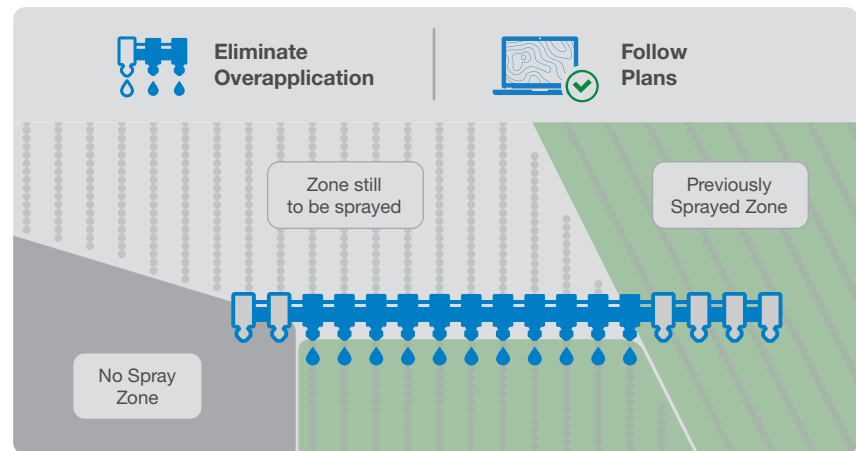

Supported Applications

- Seeding
- Planting
- Spraying
- Spreading

Operational Considerations

- Section width is dependent on physical machine configuration
- Capable of individual nozzle control if machine allows

Auto section control (ASC) is a function of application control that switches sections of an implement in order to apply inputs more precisely. Our feature is compatible with Topcon and 3rd party ISOBUS controllers to prevent over-application and follow precision management strategies.

Featuring

- Boundary line section control (field boundary or exclusion zone)
- Easily excluded headland areas
- Automatic shutoff in previously covered areas

Compatible Topcon Controllers

ASC-10

CM-20

CM-40

SM-1/3
