

Smart Start Feed Management

Complete feeding solution designed for all feed mixers, suited for operations of all sizes.

Feed Management

Precision feed loading

As feed represents roughly 50% of livestock costs, it's essential to incorporate a precision management plan to maximize returns. Upon determining TMR, loading is the next critical step in managing inputs, improving efficiency, optimization, and enabling performance tracking. The Digi-Star 2810 ensures accurate execution and logging, providing necessary metrics to improve operational profitability; know exactly what's going in and what it's returning.

Compatible with virtually any TMR mixer on the market, the solution offers indicator options featuring Bluetooth® for remote connectivity. Additionally, for increased monitoring capability, the solutions come standard with a mobile application named TAP FEED — providing cab control, feed sheets, and remote support. The solutions are designed for organic user-progression, offering basic data logging today with the option to connect to advanced feed management software via Topcon Agriculture Platform (TAP FEED).

Optimize TMR inputs through precision loading, improving profitability

Free mobile app (TAP FEED) for in-cab control and monitoring improving efficiency and eliminating manual feed sheets

Remote support capability for reduced downtime

Connect to TAP FEED and have the most advanced feed management software tied directly to the mixer

1

Digi-Star 2810

Bluetooth® indicator on feed mixer acting as controller and display

2

Digi-Star 2010

Smart junction box with integrated Bluetooth® functionality

3

TAP FEED App

In-cab app for increased control

4

Load Cell

Load cells for accurate weight measurement

Key Solution Features

- Free mobile device application, TAP FEED for Android and iOS.
- Integrated Bluetooth® on 2810 indicators for remote connectivity
- Indicators offer 1.7" (43 mm) sunlight-readable display
- Preset weight function
- Internal alarms
- Rotation counter/timer
- Machine hour meter

TAP FEED - Feed Management

TAP FEED

TAP FEED (Lite) is the latest evolution in modern feed management. Tied directly to the feed mixer to drastically improve workflow efficiency, the software provides key, clear and powerful functionality to manage livestock's greatest operating cost.

TAP FEED App

Cab Control

Control the 2810 indicators on the feed mixer remotely (in-cab).

Loads

Program precise feed rations and use mobile device as simple batching tool. Easy to input loads, resize and export.

Scale Tracker

Allows technicians to provide remote support to operators.

Complementary Solutions

Advanced Feed Management

TMR Tracker for complete feed management software

Rotation Counter

Indicates desired number of revolutions
