

Correction Services

Topnet Live

The best of RTK and PPP with flexible subscriptions

Topnet Live is a real-time GNSS correction service delivering high quality data to GNSS receivers used for surveying, construction, GIS, mapping, OEM, system integrators and agricultural applications worldwide. Fully interoperable with all makes of network capable rovers, subscriptions are made easily available through the Topnet Live website.

FEATURES

- Truly global solution
- Operated by Topcon
- Seamless solutions
- Reliable service
- Flexible and tailored
- Fully scalable

| | REALPOINT | STARPOINT PRO | SKYBRIDGE |
|---|--|---|--|
| Correction Type / Delivery | RTK via NTRIP | PPP via L-Band | Correction via satellite |
| Coverage | Regional | Global | Regional or Local |
| Horizontal Accuracy* | 2 cm | 3 cm | Infill for RTK |
| Vertical Accuracy* | — | 5 cm | |
| Initialization or Convergence Time** | Seconds | < 20 mins | Seamless Activate automatically |
| Industries | Surveying, Construction, Machine Control, Agriculture, OEM, Industrial IoT and Autonomous Robotics | Agriculture, OEM, Surveying in Remote Areas, Automotive, Industrial IoT and Autonomous Robotics | Surveying, Construction, and Agriculture |

*The specifications are based upon field and laboratory testing. Accuracy and convergence time may be affected by user hardware type (antenna/receiver), available GNSS constellation (PDOP), and site conditions.

**Performance may be degraded in conditions with high ionospheric activity, extreme multipath, or under dense foliage. For maximum system accuracy, always follow best practices for GNSS data collections.
