

AGS-2 Receiver and Steering Controller

1

Full Featured Autosteering

Designed to suit virtually any agricultural machine type, make and model, the Topcon AGS-2 receiver and steering controller combines field-proven steering with leading network reception and tracking capability.

Fully capable in any application, the AGS-2 comes standard with WAAS and EGNOS correction services. It is easily upgradeable to leading accuracy utilizing NTRIP and the optional RTK radio in the Topcon CL-55 cloud connectivity device. Now designed with the SkyBridge feature, the AGS-2 provides better satellite tracking and RTK float transitions for consistent accuracy during impacted conditions.

Coupled with Topcon X Family consoles, steering control, and correction services, the AGS-2 offers tailorable steering solutions for every operation.
